Legal Services: We do not count the number of hours volunteer Attorneys, Paralegals, Legal Secretaries or Notary Publics have given to our Legal Clinic Program as “Services in Kind.” We know these professionals will be filing their hours on their own personal federal and state tax returns. We cannot put a value on the hours they have given as Pro Bono to the Foundation, as each professional puts a value on their own time. We only count the salary rendered our employ as the actual cost of the program to us. The real true value of the legal documents we help provide veterans, and their spouses, will be realized in the future, when having a will, power of attorney, medical directives, etc., will be needed to settle the legalities associated with a death.
